- WLTP data currently being approved. Minimum - maximum mixed WTLP CO2 emissions on the engine The CO2 emissions from the vehicle depend on the version selected as well as the options on the vehicle.
- **Dealer delivery related charges, metallic paint and tyre recycling levy not included.
- ***Includes SEAI grant and VRT rebate

(1) The CO2 emissions entered are mixed and expressed in grams per kilometre. The fuel consumption and CO₂ emission values provided comply with WLTP approval (EU regulation 2017/948). Since 1 September 2018, new vehicles are approved on the basis of the worldwide harmonised light-duty vehicles test procedure (WLTP), which is a new, more realistic test procedure to measure fuel consumption and CO₂ emissions. This WLTP procedure fully replaces the New European Driving Cycle (NEDC), which was the previous test procedure. As the test conditions are more realistic, the fuel consumption and CO₂ emissions measured according to the WLTP procedure are, in many cases, higher than those measured according to the NEDC procedure. The fuel consumption and CO₂ emission values may vary depending on specific equipment, options and types of tyres. Contact your point-of-sale for more information. More information on www.peugeot.ie

STANDARD EQUIPMENT

SAFETY & SECURITY

- Airbags: Adaptive driver and front passenger airbags (includes passenger airbag deactivation function)
